

Yash Kumar

Pune, Maharashtra, India | +91 7970569251 | yashkr7970@gmail.com | [GitHub](#) | [LinkedIn](#) | [Portfolio](#)

Summary

Full-Stack Developer with experience building scalable web and mobile applications using React, Spring Boot, Supabase, and REST APIs. Skilled in backend architecture, authentication systems, AI-enabled workflows, and cross-platform product development.

Experience

Full Stack Developer Intern

May 2026–Present

AIValytics

- Developing React-based admin dashboards, authentication workflows, and database-driven features.
- Integrating backend APIs and implementing secure role-based access controls.
- Collaborating through Git/GitHub workflows and contributing to production-ready product development.
- Working with Firebase, Supabase, and AI-enabled workflows to enhance platform capabilities.

Generative AI Intern

Jun–Jul 2025

Prodigy Infotech

- Built 3+ AI mini-projects using Hugging Face Transformers and Python.
- Applied diffusion models and prompt engineering techniques for optimized outputs.
- Enhanced chatbot workflows reducing manual response effort by ~30%.
- Executed model fine-tuning and evaluation experiments to improve output quality.

Technical Skills

- **Languages:** Python, Java, C++, JavaScript
- **Web:** React, React Native, Spring Boot, Flask, HTML, CSS, REST APIs
- **Databases:** MySQL, MongoDB, Firebase, Supabase (PostgreSQL)
- **AI/ML:** Transformers, Diffusion Models, Prompt Engineering, ML Integration
- **Tools:** Git, GitHub, Docker, Postman.

Education

B.Tech in Computer Science Engineering

2023–2027

MIT ADT University, Pune

CGPA: 8.23

Relevant Coursework: DSA, DBMS, Web Development, Machine Learning, LLMs

Projects

SpeciWise – Scalable Career Recommendation Platform

[GitHub](#)

Tech Stack: React (Vite), React Native (Expo), Java, Spring Boot, Supabase, PostgreSQL, MySQL, JWT, ML

- Engineered a full-stack cross-platform recommendation system using a custom Weighted Interest Scoring Model (WISM) achieving ~85% recommendation accuracy.
- Designed a multi-stage adaptive assessment pipeline (Domain → Branch → Specialization) improving decision precision and user engagement.
- Built scalable backend architecture using Spring Boot, Supabase, PostgreSQL, MySQL, and Row-Level Security (RLS).
- Implemented JWT authentication, REST APIs, and event-level analytics to track user behavior and reduce drop-offs.
- Enabled cross-device synchronization with persistent sessions and deployed production-ready builds using Vercel and Expo EAS.
- Research paper based on the recommendation methodology is currently under publication.

Fintrac – Expense Tracking System

[GitHub](#)

Tech Stack: React, Spring Boot, MySQL, JWT

- Engineered a full-stack finance tracker managing 1000+ transactions securely.
- Implemented JWT authentication and user-specific transaction access controls.
- Designed adaptive budgeting workflows improving expense tracking efficiency by ~25%.
- Built analytics dashboards with real-time insights and reporting.

Placement Assessment Platform

[GitHub](#)

Tech Stack: React, Vite, JavaScript, Docker, REST APIs, CSV Processing

- Developed a company-wise placement assessment platform supporting MCQ and coding evaluations.
- Designed structured CSV import workflows to minimize parsing and validation errors.
- Built student analytics dashboards and test management modules for recruiters and administrators.

Certifications & Achievements

- Google IT Automation with Python – Coursera (2024)
- Spring Framework for Java Development – SkillUp
- Winner – Wepitch Startup Competition (2024)
- Selected – Smart India Hackathon 2024 & 2025

Leadership & Activities

- Secretary – GeeksforGeeks Coding Club; conducted coding sessions and technical workshops.
- Mentored juniors in Python and DSA through peer learning initiatives.
- Gold Medalist – University Cricket Team.

Languages

English (Fluent) Hindi (Fluent) Spanish (Basic)
