Yash Kumar

Full-Stack Software Engineer | Java, Spring Boot, React

Pune, Maharashtra, India | +91 7970569251 | yashkr7970@gmail.com | GitHub | LinkedIn | Portfolio

SUMMARY

Full-stack developer who builds **Spring Boot + React** applications with **JWT authentication**, **role-based access control**, and **analytics dashboards**. Currently interning at **AIValytics**; built and documented **three end-to-end projects**. Familiar with **Hugging Face Transformers** and **prompt engineering** from a generative-AI internship.

EXPERIENCE

Full-Stack Developer Intern – AIValytics, Pune *May 2026 – Present*

AI education and analytics company building AI practitioners and giving academic institutions data-driven tools.

- Built a **React admin dashboard** module for **user management**, used by multiple students.
- Implemented **role-based access control** with **2 roles**, restricting **3 API endpoints** to authorized users.
- Integrated backend APIs with **Supabase** and **Firebase** for authentication and application data.
- Built **n8n automation workflows** supporting AI-enabled product features.

Generative AI Intern – Prodigy Infotech, Mumbai (Remote) *Jun 2025 – Jul 2025*

- Built **3+ generative-AI mini-projects** in **Python** with **Hugging Face Transformers**, including a chatbot with **prompt-engineered** response flows.
- Experimented with **diffusion models**, **fine-tuning** a generative model on a **Kaggle dataset** and comparing outputs across configurations.

PROJECTS

SpeciWise – Career Recommendation Platform | GitHub

React (Vite), Java, Spring Boot, JWT, Supabase (PostgreSQL), MySQL

- Built a **full-stack platform** that guides students through domain, branch, and specialization choices using **structured assessments**.
- Designed a **weighted interest-scoring engine** that converts responses into category scores and **ranked specialization recommendations**.
- Built **Spring Boot REST APIs** for auth, quiz responses, sessions, and results, secured with **JWT** and per-user data access.
- Created an **analytics dashboard** for scores, progress, and specialization readiness; documented the **scoring methodology and architecture**.

Fintrac – Expense Tracking System | GitHub

React, Spring Boot, MySQL, JWT

- Built a **full-stack expense tracker** with **REST APIs** for transactions, budgets, authentication, and reports.
- Implemented **JWT authentication** and **user-scoped access** so each user can only read and modify their own financial records.
- Added **budgeting workflows** and **real-time spending dashboards**; tested with **1,000+ transaction records**.

Placement Assessment Platform | GitHub

React (Vite), JavaScript, Python, Docker, REST APIs

- Built a company-wise **assessment platform** with a **Python backend** supporting **MCQ and coding questions**, with separate recruiter/admin and student views.
- Designed a **CSV import pipeline** with row-level validation so bulk question uploads fail safely with clear errors.
- Built **test-management modules** and **student analytics dashboards**; containerized with **Docker** for reproducible setup.

TECHNICAL SKILLS

- **Languages:** Java, Python, JavaScript, C++
- **Backend & Frontend:** Spring Boot, REST APIs, JWT authentication, role-based access control, Flask, React, Vite, HTML, CSS
- **Databases:** PostgreSQL (Supabase), MySQL, MongoDB, Firebase
- **AI/ML & Tools:** Hugging Face Transformers, prompt engineering, model evaluation; Git, GitHub, Docker, Postman, n8n

EDUCATION

B.Tech, Computer Science Engineering – MIT ADT University, Pune *2023 – 2027*

CGPA: 8.23/10 | Coursework: Data Structures & Algorithms, DBMS, Web Development, Machine Learning, LLMs

ACHIEVEMENTS & LEADERSHIP

- **Top 6 Finalist**, WePitch 1.0 Startup Competition (out of **36 teams**); pitched **Vroom-Mates**, a carpool platform for daily commuting.
- **Vice President, GeeksforGeeks Coding Club:** led **5 sessions and 3 workshops**; mentored juniors in Python and DSA.
- **Gold Medalist**, University Cricket Team.
- **Certifications:** Google IT Automation with Python (Coursera, 2024); Spring Framework for Java Development (SkillUp).
